Agri firms' stocks hold ground

Share prices of many fertiliser, agri-input companies have gained more than leading indices

NIKITA VASHISHT & DEEPAK KORGAONKAR
New Delhi/Mumbai, 7 January

Even as farmers camp on Delhi's borders to protest against three laws that open up India's tightly regulated agricultural markets, one may have presumed that their hunkering down would reflect negatively on shares of agri-input and fertiliser companies.

Though a few have seen a marginal decline since November 27, 2020 (when the protests started), many agri-linked stocks continue to outpace indices such as the Sensex and Nifty (*see table*).

Stock prices of 21 such companies had risen in high double- and triple-digits in the 11 months prior to the end of November. Since November, while some agro-chemicals stocks like P I Industries and Rallis have lagged behind benchmark indices, Bayer Crop Science and UPL have gained between 13 per cent and 16 per cent. Likewise, fertiliser companies Chambal Fertilisers, GSFC, and Fertilisers & Chemicals gained between 18 and 24 per cent since November, while Coromandel International and GNFC lagged behind the 9 per cent gains of the Sensex and Nifty.

Gaurang Shah, head investment strategist at Geojit Financial Services, says stocks are consolidating after a sharp rally. "The agri-input sector has been outperforming the benchmark indices on the back of the government's various initiatives under the Aatmanirbhar Bharat programme. Besides, a lower Covid-19 impact on rural India, and bumper kharif harvest aided rural income ... All these factors together contributed towards the out-performance," he said.

Others experts concur and don't expect protests to have a significant impact on agri stocks.

G Chokkalingam, founder and chief

CMP: Current market price; Source: Capitaline, Bloomberg

Compiled by BS Research Bureau

investment officer at Equinomics Research, says: "The on-going protests will not have much impact on the stock prices because sowing (of rabi crops) is largely over and harvest is pending. Farmers wouldn't allow their produce to be destroyed in their farms; therefore, these protests shouldn't worry investors." Stocks from this theme have taken a breather as they have already played out successfully in a big way, he adds.

Taking stock

Stocks of 13 agro-chemical firms have moved between minus 20 per cent and 120 per cent on a year-to-date basis. Of this, only two have delivered negative returns, with their average return working out to 57 per cent. Likewise, returns of eight fertiliser stocks range between

3 per cent and 53 per cent; the average is 37 per cent. In comparison, the one-year gains of the Sensex and Nifty were 16 per cent and 15 per cent, respectively.

A normal monsoon helped the rabi season to start on time. Till December 4, wheat sowing was up around 1 per cent year-on-year (YoY), pulses sowing was up 3 per cent, and the sowing of gram was up 14 per cent YoY, said a CRI-SIL report. The sowing of the rabi crops is expected to be 2 per cent higher than in 2019 while foodgrain production is likely to be up 3 per cent YoY.

"Government support, decent profitability in the last two crop cycles for farmers, and a higher reservoir level provide the comfort that growth may be seen in the upcoming rabi acreage. Else, acreage may at least be at the same

level as last year. This bodes well for fertiliser and agrochemical consumption in H2FY21," said analysts at Motilal Oswal Financial Services in a report.

A report by Edelweiss Securities said the Bills passed to deregulate agricultural markets were "a move in the right direction" and they would help farmers in the end.

Crop prices have remained soft (excluding those of *arhar* and soybean) in comparison to the minimum support price (MSP) the government pays farmers. Prices of crops (bajra, maize, ragi, and jowar) across open markets/*mandis* have remained nearly 20 per cent below MSP, said the brokerage. The laws are likely to help farmers sell in any part of the country and reduce their dependence on *mandis*.

"We expect farmers to gain from improved kharif yields. Also, better MSP and higher procurement by the government are likely to enhance the liquidity position of farmers," it said.

Earnings momentum to accelerate

Earnings momentum is likely to accelerate in the December quarter of FY21 (Q3 FY21), estimate analysts at Edelweiss Securities, who expect firms under their coverage to report 15 per cent YoY growth, driven by a good start to rabi along with a healthy cash flow position of farmers.

They expect UPL's domestic business and PI Industries (domestic business) to log 40 per cent and 37 per cent YoY profit growth, respectively, driven by a conducive environment.

Besides, Dhanuka Agritech is likely to yield 18 per cent YoY net profit growth, while Coromandel International's profit is estimated to grow 23 per cent. Rallis is among the few exceptions, expected to post an 8.5 per cent decline in net profit for the December quarter.

Standard travel policy to ease purchase of product

Those travelling to developed countries or needing elaborate coverage should consider existing plans

BINDISHA SARANG

The Insurance Regulatory and Development Authority of India (Irdai) has focused in recent months on getting insurers to launch standard insurance policies. There is Saral Jeevan Bima for term insurance, Arogya Sanjeevani for health insurance, a standard personal accident cover, and so on. It recently came out with an exposure draft for standard travel insurance policies for domestic and overseas travel. This policy will be launched on April 1.

Will act as benchmark

A standard policy can serve as a benchmark for customers. Sanjay Datta, chief of underwriting-claims and reinsurance, ICICI Lombard General Insurance, says, "Customers find it difficult to understand insurance wording and covers. With a standard cover, they get a benchmark against which they can compare other covers."

Those who find it difficult to compare features across policies can go for the standard one, assured in the knowledge that they will get a policy whose features have been mandated by the regulator.

Expect it to be cost-efficient

While the standard policy's features will be uniform across general insurers, other aspects can vary. Pankaj Verma, head-underwriting, SBI General Insurance, says, "Insurers can determine the premium and add-ons themselves."

Since the policy will be basic in nature, it is expected to cost less.

Milind V Kolhe, chief underwriting and reinsurance officer, Bharti AXA General Insurance, says, "Insurers will price the product, depending on various internal parameters, like their underwriting experience. But compared to the products available today, the price of the standard product should be a little lower."

Pricing will also depend on coverage.

Naval Goel, chief executive officer and founder, PolicyX, says, "Some of the existing plans could be more or less expensive than the standard cover, depending on the amount and breadth of coverage and add-ons they offer."

Multiple options available

The standard travel policy will be available as an individual and a group cover, and for domestic as well as overseas travellers.

MANDATORY BENEFITS IN STANDARD TRAVEL POLICIES

Coverages provided	Proposed sum insured*
Hospitalisation (accident illness)	1,00,000
Hospital cash (for a maximum of 7 days; 2 days deductible)	25
Life threatening condition due to pre-existing diseases	10,000
Accidental death/personal accident	10,000
Permanent total disability (PTD)	10,000
Permanent partial disability (PPD)	5,000
Repatriation of mortal remains	10,000
Ambulance charges	500
*\$ or equivalent	Source: Irdai

The domestic policy will have five variants: travel by any mode of public transport — within city and outside city; train journey; air travel; and domestic tours involving road, water, train, and air travel. The overseas policy will have four variants: long-term trip (students); short-term trip (tours/leisure which covers travel by road, water, train and air); multi-trip during a policy period (business); and coverage only for travel (onward and return).

Who should go for it?

Travellers with basic needs should opt for the standard cover. Dutta suggests that travellers look at the coverages to understand which policy — standard or non-standard — suits their needs better. "If your needs are basic, choose the standard policy as price comparison across companies will be easier."

Your perception of risk should also play a part. Kolhe says, "In many existing products, there are more covers, which may not have a high frequency of claims, but if the event happens, the severity could be high."

Choose depending on the destination you are travelling to. If you are travelling to the US, Canada or Europe, you may be better off avoiding the standard policy. "The liabilities tend to be higher in these countries, so it may be difficult to be properly covered with a standard policy," adds Kolhe.

The nature of your trip will also matter. The standard cover may not cover a wild-life African Safari, while some existing plans could.

Union AMC aims to double assets base to ₹10,000 cr

ASHLEY COUTINHO
Mumbai, 7 January

Union AMC has set sights on doubling its assets under management (AUM) to ₹10,000 crore this calendar year, from about ₹5,000 crore at the end of December last year.

The fund house has more

branches, workforce, and number of customers at its disposal thanks to the amalgamation of Andhra Bank and Corporation Bank with Union Bank of India (UBI) last year. It has also shifted focus to driving the business through distributors, besides UBI.

To that end, the company improved its share of non-

associate distributors to about 11 per cent of average AUM in November 2020, from close to 3 per cent of the monthly average AUM two years ago. Close to 39 per cent of its average AUM as of November 2020 came from beyond the 30 biggest cities, against an industry average of 16 per cent.

G Pradeepkumar, CEO of Union AMC, said: "Union AMC underwent significant ownership changes between 2016 and 2018. Vinay (Paharia) has implemented a robust investment process that has resulted in an improvement in the performance of various schemes. Our foreign partner has given us

a mandate to manage portfolios through the FPI route."

In 2018, Dai-ichi Life Holdings of Japan invested 39.6 per cent of the post-issue share capital through compulsorily convertible preference shares in Union AMC, resulting in the former becoming a co-sponsor with UBI.
