Additional disclosures
Note 1: Risk factors:
Risks associated with writing Covered Call Options for Equity Shares: A call option gives the holder (buyer) the right but not the obligation to buy an asset by a certain date for a certain price. Covered calls are an options strategy where a person holds a long position in an asset and writes (sells) call options on that same asset to generate an income stream. The Scheme may write call options under covered call strategy, as permitted by the regulations. Risks associated thereto are mentioned below:
• Opportunity cost: A covered call strategy limits the upside potential of the underlying stock. If the stock rises sharply, the gains above the call option's strike price will be missed out. When the underlying asset's price rises above the strike price, the short call loses its value as much as the underlying stock gains and as a result the upside of the stock always gets capped. Downside risk is reduced by writing covered call options.
• Exit issues / Illiquidity risk: If the strike price at which the call option contracts have been written become illiquid, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity. Also, if the covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately in case where the view changes to sell and exit the stock.
• The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme. This may restrict the ability of scheme to utilize options strategies.

Note 2
Section II Part II Where will the scheme invest?
Covered Call Options
The covered call strategy is a hedge strategy, where fund manager writes (sells) call options only on shares that it holds long (the underlying equity held in the portfolio). This approach provides two main benefits:
• The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme.
• This strategy is also employed when the Fund Manager has a short-term neutral view on the asset and for this reason holds the asset long and simultaneously takes a short position via covered call option strategy to generate income from the option premium.
This, it helps hedge market risk and can enhance returns for investors when implemented effectively.

Note 3:
Investment Restrictions
The fund can write Call options under a covered strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to the following:
a) The total notional value (taking into account strike price as well as premium value) of call options written by a scheme Ltd not exceed 15% of the total market value of equity shares held in that scheme.
b) The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.

- c) At all points of time the Mutual Fund scheme shall comply with the provisions at points (a) and (b) above. In case of any passive breach of the requirement at paragraph (a) above, the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
- d) In case a Mutual Fund scheme needs to sell securities on which a call option is written under a strategy, it must ensure compliance with paragraphs (a) and (b) above while selling the securities.
- e) In no case, a scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- f) The premium received shall be within the requirements stated in paragraph 12.25 of the Master Circular dated June 27, 2024 i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
- g) The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of paragraph 12.24 of the Master Circular.
- h) The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the respective scheme(s) until the position is closed or expired.

Aforesaid change in scheme features constitute change in fundamental attributes of the Scheme in accordance with Regulation 18 (15A) of SEBI (Mutual Funds) Regulation, 1996. In terms of prevailing regulatory requirements, investors in the Scheme are given an option to exit at the prevailing Net Asset Value (NAV) without any exit load, in case they do not wish to continue in this Scheme in view of the change in the fundamental attributes. The period of this no load exit offer is from January 29, 2026 to February 27, 2026 (both days inclusive). The redemption request for this purpose may be submitted at any of Official Points of Acceptance of Transactions (OPAT) of Franklin Templeton Mutual Fund, and the NAV applicable will be based on the day and time the application is received at any of the designated OPAT. Unitholders who do not exercise the exit option on or before 3.00 pm on February 27, 2026 would be deemed to have consented to the proposed change.
However, the exit option without load will not be available to investments in the Scheme made on or after January 29, 2026. Unitholders who have pledged their units will need to procure a release of their pledge prior to submitting their redemption request. The changes in scheme features have been approved by the Board of Directors of the Franklin Templeton Asset Management (India) Pvt. Ltd. (investment manager for schemes of Franklin Templeton Mutual Fund) and Franklin Templeton Trustee Services Pvt. Ltd. (the Trustee to the schemes of Franklin Templeton Mutual Fund).
All the other terms and conditions of the Scheme Information Document of the Scheme, read with the addenda issued from time to time, will remain unchanged.
This addendum forms an integral part of the Scheme Information Document and Key Information Memorandum issued for the Scheme, read with the Addenda.

This addendum is dated January 21, 2026.
