Axis Bank closing in on Citi India's consumer biz

Kotak Mahindra Bank is still in the race, but has submitted a lower bid than Axis Bank, so ranks second in Citi's order of preference

NUPUR ANAND
Mumbai, January 17

AXIS BANK HAS emerged as the frontrunner to buy Citi's consumer business in India, which is being valued at around $1.5 billion in a planned deal that's likely to happen this month, according to two sources with direct knowledge of the matter. Another Indian lender, Kotak Mahindra Bank, is still in the race but has submitted a lower bid than Axis Bank so ranks second in Citi's order of preference, the sources told Reuters.

Axis Bank and Kotak Mahindra Bank did not respond to requests for comment.

"We continue to move forward with our process with respect to our India consumer business sale in accordance with our broader strategic refresh," said Citi India in response to an email query on the deal's status.

Wall Street giant Citi said last year that it would exit its consumer franchises in 13 markets, including India, as it refocuses on its more lucrative institutional and wealth management businesses. Its Indian consumer banking business comprises credit cards, home loans and retail banking.

Acquiring the assets would strengthen the high-end credit card and mortgage businesses of Axis Bank, India's third largest private lender, analysts at ICICI Direct said in a note. "The acquisition of Citi's India retail business would further help Axis Bank to expand their reach and create more opportunities," they added.

Citi has been in India for decades and was among the first bank to introduce Indians to credit cards in 1987.

It had a portfolio of 2.57 million credit cards in the country as of November, according to the Indian central bank, while Axis Bank's card portfolio exceeded 7.9 million. Even though Axis has more cards, Citi reported higher spend per card.

Citi's total retail loan book in India stood at ₹21,600 crore ($2.91 billion) for 2021, Systematix Institutional Equities said in a report last month.

HDFC Bank shares fall after Q3 results despite broadband growth

FE BUREAU
Mumbai, January 17

DESPITE LOWER GROWTH in fee income, brokerages have increased price targets for HDFC Bank shares. The country's largest private bank reported an 18% year-on-year (Y-o-Y) rise in its October-December net profit to ₹10,342.2 crore — primarily backed by stable asset quality and a healthy rise in the net interest income (NII).

Shares of the bank dipped in Monday's trading session and closed at ₹1,521.55 on the BSE, down ₹23.70 or 1.5%. "The numbers overall looked okay for the private bank, even on the provisioning side; however, it broadly failed to excite the market. Further, the fee income has been negative for the bank, however, this is not durable and will improve in the coming quarters. Going ahead, bottom line performance for the industry is expected to improve amid a decline in the credit cost in H1CY22, while revival in credit off take is seen to be instrumental in driving earnings trajectory from H2CY22 onwards," Pankaj Pandey, head of research, ICICIdirect, told *FE*.

YES Securities, while maintaining an 'Add' rating on HDFC Bank, revised its target price downward to ₹1,735 from ₹1,750 earlier, saying weakness in fees from payments business is a new challenge. "Management explained that the overall payments business fee growth was negative YoY due to fee waivers being given out as incentive. It also said the practice of fee waivers could be adopted again going forward on an intermittent basis. At the same time, they emphasised that there is no pressure on MDR (merchant discount rate) or interchange fee from a rate point of view. They expect a long-term CAGR of mid to high teens for card fees and reversion to such trajectory could take 2-4 quarters. They explained that the profitability of the credit card business could be retained, even if fees declined, by adjusting reward points and cashbacks," it noted.

HDFC Bank's bottom line was led by a healthy pick-up in the retail segment, Motilal Oswal said, adding that growth in commercial and rural banking also remained robust and broadly the earnings were in line, despite additional contingent provisions. "Asset quality ratios have improved, while the restructured book too moderated to ~1.4% of loans. Healthy provisioning coverage and a contingent provision buffer provide comfort on asset quality. Pick up in loan growth, particularly Retail, would aid NII and margin, which would drive profitability in the coming quarters," it said.

Foreign brokerage firm CLSA said, "We expect earnings to be resilient with an 18% EPS CAGR over FY22-24CLsa the bank carried large provisioning buffers on our credit cost assumption of ₹1.00 bps for FY23/24CL," the brokerage said, with a 'BUY' rating and a target price of ₹2,025.

Banks, financial entities struggling to cope with rising frauds: Deloitte India survey

PRESS TRUST OF INDIA
New Delhi, January 17

IN THE WAKE of Covid-19 and new digital operations, banking and financial institutions have been struggling to deal with an increasing number of fraud incidents, and the trend is expected to continue, a Deloitte India survey said on Monday.

Key reasons identified for the increase in frauds over the next two years include large-scale remote working models, increase in customers using non-branch banking channels and the limited/ineffective use of forensic analytics tools to identify potential red flags, Deloitte Touche Tohmatsu India LLP (DTTL) said in a release.

"In the wake of Covid-19 and new digital operations, banking and financial institutions have been struggling to deal with an increasing number of fraud incidents, and the trend is expected to continue, a Deloitte India survey said on Monday.

Key reasons identified for the increase in frauds over the next two years include large-scale remote working models, increase in customers using non-branch banking channels and the limited/ineffective use of forensic analytics tools to identify potential red flags, Deloitte Touche Tohmatsu India LLP (DTTL) said in a release.

"In the wake of Covid-19 and new digital operations, banking and financial institutions have been struggling to deal with an increasing number of fraud incidents, and the trend is expected to continue, a Deloitte India Banking Fraud Survey said, adding "this trend is expected to continue, with 78% respondents stating that frauds could increase over the next two years".

According to the findings, retail banking was identified as a major contributor to fraud incidents, with 59% of respondents indicating that they had experienced more than 100 frauds over the last two years (-- a 29% rise since the previous edition.

Similarly, the non-retail segment saw an average of 20 frauds, highlighted by 56% of survey respondents -- again, a 22% rise.

"Additionally, data theft, cybercrime, third-party-induced fraud, bribery and corruption, and fraudulent documentation have been identified as the top five concerns with over 42% of respondents (cumulative) reporting to be victims of these," the release stated.

Survey respondents indicated that the top three outcomes of Covid-19 on their Fraud Risk Management (FRM) function would be increased dependence on analytical tools for fraud monitoring and detection (25%), the need to create awareness about fraud among customers and employees (2.9%), and a change in the target operating model to enhance capabilities of the remote FRM function (21%).

Speaking on the launch of the survey findings KV Karthik, partner, financial advisory, Deloitte India, said the impact of the pandemic has resulted in institutions across the globe operating in an entirely new environment.

Exports of oilmeal down 67% in Dec

FE BUREAU
Pune, January 17

OILMEAL EXPORTS FELL 67% to 1.7 lakh tonne in December due to decline in export of soybean and rapeseed meal, according to the Solvent Extractors Association of India (SEA).

The association, which has compiled the export data for December, said 1,70,338 tonne of oilmeal was exported in the month, compared to 5,16,006 tonne in the corresponding period last year. The overall export of oilmeals during April–December dropped 26% to 1,766,687 tonne, compared with 2,467,564 tonne.

"Soybean crush margins in India are currently squeezed by processors on meal prices and relatively high price expectation of farmers for soybean seed, which is currently quoted over ₹6,300 per quintal," SEA said. "At present, India is outpriced for soybean meal export. Ex-Kandla are quoted at $750 per tonne as against Brazil origin's $535 per tonne and Argentina's $525 per tonne," the association said. "India is unlikely to be competitive for export in next 2-3 months due to high price of domestic soybean seed. Lesser crushing of soybean has resulted in higher import of crude soybean oil. In case of rapeseed, seeds are not available for crushing and that has affected export of rapeseed meal in the last two months."

Axis Bank closing in on Citi India's consumer biz

Kotak Mahindra Bank is still in the race, but has submitted a lower bid than Axis Bank, so ranks second in Citi's order of preference

NUPUR ANAND
Mumbai, January 17

AXIS BANK HAS emerged as the frontrunner to buy Citi's consumer business in India, which is being valued at around $1.5 billion in a plan ned deal that's likely to happen this month, according to two sources with direct knowledge of the matter. Another Indian lender, Kotak Mahindra Bank is still in the race but has submitted a lower bid than Axis Bank so ranks second in Citi's order of preference, the sources told Reuters.

Axis Bank and Kotak Mahindra Bank did not respond to requests for comment.

"We continue to move forward with our process with respect to our India consumer business sale in accordance with our broader strategic refresh," said Citi India in response to an email query on the deal status.

Wall Street giant Citi said last year that it would exit its consumer franchises in 13 markets, including India, as it refocuses on its more lucrative institutional and wealth management businesses. Its Indian consumer banking business comprises credit cards, home loans and retail banking.

Acquiring the assets would strengthen the high-end credit card and mortgage businesses of Axis Bank, India's third largest private lender, analysts at ICICI Direct said in a note. "The acquisition of Citi's India retail business would further help Axis Bank to expand their reach and create more opportunities," they added.

Citi has been in India for decades and was among the first bank to introduce Indians to credit cards in 1987.

It had a portfolio of 2.37 million credit cards in the country as of November, according to the Indian central bank, while Axis Bank's card portfolio exceeded 7.9 million. Even though Axis has more cards, Citi reported higher spend per card.

Citi's total retail loan book in India stood at ₹23,600 crore ($2.91 billion) for 2021, Systematix Institutional Equities said in a report last month.

HDFC Bank shares fall after Q3 results despite broadband growth

FE BUREAU
Mumbai, January 17

DESPITE LOWER GROWTH in fee income, brokerages have increased price targets for HDFC Bank shares. The country's largest private bank reported an 18% year-on-year (Y-o-Y) rise in its October-December net profit to ₹10,342.2 crore — primarily backed by stable asset quality and a healthy rise in the net interest income (NII).

Shares of the bank dipped in Monday's trading session and closed at ₹1,521.35 on the BSE, down ₹23.70 or 1.5%. "The numbers overall looked okay for the private bank, even on the provisioning side; however, it broadly failed to excite the market. Further, the fee income has been negative for the bank, however, this is not durable and will improve in the coming quarters. Going ahead, bottom line performance for the industry is expected to improve amid a decline in the credit cost in H1CY22, while revival in credit offtake is seen to be instrumental in driving earnings trajectory from H2CY22 onwards," Pankaj Pandey, head of research, ICICIdirect, told *FE*.

YES Securities, while maintaining an 'Add' rating on HDFC Bank, revised its target price downward to ₹1,735 from ₹1,750 earlier, saying weakness in fees from payments business is a new challenge. "Management explained that the overall payments business fee growth was negative YoY due to fee waivers being given out as incentive. It also said the practice of fee waivers could be adopted again going forward on an intermittent basis. At the same time, they emphasized that there is no pressure on MDR (merchant discount rates) or interchange fee from a rate point of view. They expect a long-term CAGR of mid to high teens for card fees and reversion to such trajectory could take 2-4 quarters. They explained that the profitability of the credit card business could be retained, even if fees declined, by adjusting reward points and cashbacks," it noted.

HDFC Bank's bottom line was led by a healthy pick-up in the retail segment, Motilal Oswal said, adding that growth in commercial and rural banking also remained robust and broadly the earnings were in line, despite additional contingent provisions. "Asset quality ratios have improved, while the restructured book too moderated to ~1.4% of loans. Healthy provisioning coverage and a contingent provision buffer provide comfort on asset quality. Pick-up in loan growth was negative YoY due to fee waivers being given out as incentive. It also said the practice of fee waivers could be adopted again going forward on an intermittent basis. At the same time, they emphasized that there is no pressure on MDR (merchant discount rates) or interchange fee from a rate point of view. They expect a long-term CAGR of mid to high teens for card fees and reversion to such trajectory could take 2-4 quarters," said, with a 'BUY' rating and a target price of ₹2,025.

Banks, financial entities struggling to cope with rising frauds: Deloitte India survey

PRESS TRUST OF INDIA
New Delhi, January 17

IN THE WAKE of Covid-19 and new digital operations, banking and financial institutions have been struggling to deal with an increasing number of fraud incidents, and the trend is expected to continue, a Deloitte India survey said on Monday.

Key reasons identified for the increase in frauds over the next two years include large-scale remote working models, increase in customers using non-branch banking channels and the limited/ineffective use of forensic analytics tools to identify potential red flags, Deloitte Touche Tohmatsu India LLP (DTTL) said in a release.

"In the wake of Covid-19 and new digital operations, banking and financial institutions have been struggling to deal with an increasing number of fraud incidents, and the trend is expected to continue, a Deloitte India survey said on Monday.

Key reasons identified for the increase in frauds over the next two years include large-scale remote working models, increase in customers using non-branch banking channels and the limited/ineffective use of forensic analytics tools to identify potential red flags, experienced more than 100 frauds (over the last two years) — a 29% rise since the previous edition.

Similarly, the non-retail segment saw an average of 20 frauds, highlighted by 36% of survey respondents — again, a 22% rise.

"Additionally, data theft, cybercrime, third-party-induced fraud, bribery and corruption, and fraudulent documentation have been identified as the top five concerns with over 42% of respondents (cumulative) reporting to be victims of these," the release stated.

Survey respondents indicated that the top three outcomes of Covid-19 on their Fraud Risk Management (FRM) function would be increased dependence on analytical tools for fraud monitoring and detection (25%), the need to create awareness about fraud among customers and employees (23%), and a change in the target operating model to enhance capabilities of the remote FRM function (21%).

Speaking on the launch of the survey findings KV Karthik, partner, financial advisory, Deloitte India, said the impact of the pandemic has resulted in institutions across the globe operating in an entirely new environment.

Pune, January 17

OILMEAL EXPORTS FELL 67% to 1.7 lakh tonne in December due to a decline in export of soybean and rapeseed meal, according to the Solvent Extractors Association of India (SEA).

The association, which has compiled the export data for December, said 1,70,338 tonne of oilmeal was exported in the month, compared to 5,16,006 tonne in the corresponding period last year. The overall export of oilmeal during April–December dropped 28% to 1,766,687 tonne, compared with 2,467,564 tonne.

"Soybean crush margins in India are currently squeezed by pressure on meal prices and relatively high price expectation of farmers for soybean seed, which is currently quoted over ₹6,300 per quintal," SEA said. "At present, India is outpriced for soybean meal export. Ex-Kandla are quoted at $750 per tonne as against Brazil origin's $535 per tonne and Argentine's $525 per tonne," the association said. "India is unlikely to be competitive for export in next 2-3 months due to high price of domestic soybean seed. Lesser crushing of soybean has resulted in higher import of crude soybean oil, in case of rapeseed, deoiler are not available for crushing and that has affected export of rapeseed meal in the last two months."
