

**CORRIGENDUM TO E-AUCTION SALE NOTICE**

**Sale of Immovable Property of Fauna Realtors Private Limited (in Liquidation)**

This corrigendum is hereby issued to the public in general and all interested bidders under the provisions of Insolvency and Bankruptcy Code, 2016 read with IBBI (Liquidation Process) Regulations, 2016, that the auction date for the sale of properties of the Corporate Debtor under the liquidation process, initially scheduled for October 25, 2024, which was mentioned in the auction notice dated September 28, 2024, has been rescheduled. **The new date for the auction is October 29, 2024, and the auction notice dated September 28, 2024, shall be read accordingly.**

All other terms and conditions mentioned in the auction notice dated September 28, 2024, remain unchanged.

திருச்சியில் மழை நிவாரண முகாம்களை தயார் நிலையில் வைத்திருக்க அதிகாரிகளுக்கு மாவட்ட கண்காணிப்பு அதிகாரி விஷ்ணு உத்தரவு

திருச்சி, அக்.16- மாவட்டத்தில் அமைக்கப்பட்டுள்ள மழை நிவாரண முகாம்களை வைத்திருக்கும் அதிகாரிகளுக்கு மாவட்ட கண்காணிப்பு அதிகாரி வி. விஷ்ணு உத்தரவிட்டுள்ளார்.

திருச்சிக்கு செல்வாக்கிழமை மாவட்டக் கண்காணிப்பு அதிகாரி வி. விஷ்ணு மாவட்டத்தில் மேற்கொள்ளப்பட்டுள்ள பருவமழை முன்னேற்பாடுகள் குறித்து மாவட்ட ஆட்சியர் மா. பிரதீப்குமாரிடம் சென்று கன ஆய்வு மேற்கொண்டார். இதில், முக்கொம்பு மேலணை, கொள்ளிடம் ஆறு, காவிரி, குளசிலம், குழுமாயி ஆம்மன் கோயில் தொட்டி பாலம், திருவரங்கம் மூலத்தொட்டி, மேலூர், திருவரங்கம் மாநகராட்சிப் பள்ளி ஆகிய இடங்களில் அமைக்கப்பட்டுள்ள நிவாரண முகாம்களைப் பார்வையிட்டு செயல்பட்டுள்ள முன்னேற்பாடுகள் குறித்து கேட்டறிந்தார்.

துறைமுக மாவட்டம் புனர்வாழ்வு இயக்கம் மூலம் மேலாண்மை அமைப்பில் தயார் நிலையில் வைக்கப்பட்டிருக்கிற மழை நிவாரண முகாம்களைப் பார்வையிட்டனர்.

துறைமுக மாவட்டம் புனர்வாழ்வு இயக்கம் மூலம் மேலாண்மை அமைப்பில் தயார் நிலையில் வைக்கப்பட்டிருக்கிற மழை நிவாரண முகாம்களைப் பார்வையிட்டனர். இதில், முக்கொம்பு மேலணை, கொள்ளிடம் ஆறு, காவிரி, குளசிலம், குழுமாயி ஆம்மன் கோயில் தொட்டி பாலம், திருவரங்கம் மூலத்தொட்டி, மேலூர், திருவரங்கம் மாநகராட்சிப் பள்ளி ஆகிய இடங்களில் அமைக்கப்பட்டுள்ள நிவாரண முகாம்களைப் பார்வையிட்டு செயல்பட்டுள்ள முன்னேற்பாடுகள் குறித்து கேட்டறிந்தார்.

திண்டுக்கலில் பழனி ஊராட்சி ஒன்றியம், பச்சலநாயக்கன்பட்டி ஊராட்சியில் செய்தி மக்கள் தொடர்புத்துறை சார்பில் அரசின் சாதனை விளக்க புகைப்படக் கண்காட்சி: ஏராளமான பொதுமக்கள் பார்வையிட்டனர்

திண்டுக்கல், அக்.16- தமிழக செயல்படுத்தப்பட்டு வரும் பல்வேறு மக்கள் நலத்திட்டங்களை பொதுமக்கள் அறிந்து கொண்டு பயன்பெறும் வகையில், செய்தி மக்கள் தொடர்புத்துறையின் சார்பில், தமிழக அரசின் சாதனை விளக்க புகைப்படக் கண்காட்சி தடைபெற்றது.

எளியோர் வாழும் இடத்திலேயே சிறப்பு மருத்துவச் சேவை அளிக்கும் 'கலைஞரின் வருமுன் காப்போம் திட்டம்', உயர்த்தப்பட்ட மகப்பேறு நியூனாதி திட்டம், கர்ப்பிணி பெண்களுக்கான பராமரிப்பு நியூனாதி திட்டம், சயதலிக்குழுக்களின் கூட்டுறவுத்துறை கடன் தள்ளுபடி மற்றும் 5 பவுன் வரை தங்க நகைக்கடன் தள்ளுபடி திட்டம் ஆகியவை குறித்து பொதுமக்கள் அறிந்துகொள்ளும் வகையில் படகாட்சி காணிக்கப்பட்டது. மேலும், திண்டுக்கல் மாவட்டத்தில், ஊரக வளர்ச்சித்துறை அமைச்சர் அவர்கள், மாண்புமிகு

சின்னமணர் அருகே குச்சுணர் பேரூராட்சியில் மன்ற அவசர கூட்டம்

தேனி, அக்.16- தேனி மாவட்டம் சின்னமணர் அருகே உள்ள குச்சுணர் பேரூராட்சியின் பேரூராட்சி மன்ற அவசரக் கூட்டம் அதன் தலைவர் பி. டி ரவிச்சந்திரன் தலைமையில் நடைபெற்றது. பேரூராட்சி செயல் அலுவலர் முருகன் துணைத் தலைவர் மணிகண்டன் இளநிலை உதவியாளர் இளவரசு ஆகியோர் முன்னிலை வகித்தனர். கூட்டத்தில் முன்னதாக தமிழக துணை முதல்வராக பொறுப்பேற்றுள்ள உதயசிதி ஸ்டாலின் பணி சிறக்க வேண்டி நன்றி தெரிவிக்கும் தீர்மானம் குச்சுணர் பேரூராட்சிக்குட்பட்ட துறைச்சாமிபுரம் கிராமத்திற்கு முல்லைப் பெரியாற்றில் உறை கிணறு அமைத்து சுகாதாரமான குடிநீர் வழங்குவது பேரூராட்சி பகுதிகளில் நடைபெற்று வரும் வளர்ச்சிப்

**CORRIGENDUM TO E-AUCTION SALE NOTICE**  
Sale of Immovable Property of Pristina Promoters Private Limited (In Liquidation)  
This corrigendum is hereby issued to the public in general and all interested bidders under the provisions of Insolvency and Bankruptcy Code, 2016 read with IBI (Liquidation Process) Regulations, 2016, that the auction date for the sale of properties of the Corporate Debtor under the liquidation process, initially scheduled for October 25, 2024, which was mentioned in the auction notice dated September 28, 2024, has been rescheduled. The new date for the auction is October 29, 2024, and the auction notice dated September 28, 2024, shall be read accordingly.

**CORRIGENDUM TO E-AUCTION SALE NOTICE**  
Sale of Immovable Property of Shaft Promoters Private Limited (In Liquidation)  
This corrigendum is hereby issued to the public in general and all interested bidders under the provisions of Insolvency and Bankruptcy Code, 2016 read with IBI (Liquidation Process) Regulations, 2016, that the auction date for the sale of properties of the Corporate Debtor under the liquidation process, initially scheduled for October 25, 2024, which was mentioned in the auction notice dated September 28, 2024, has been rescheduled. The new date for the auction is October 29, 2024, and the auction notice dated September 28, 2024, shall be read accordingly.

**CORRIGENDUM TO E-AUCTION SALE NOTICE**  
Sale of Immovable Property of Navigator Developers Private Limited (In Liquidation)  
This corrigendum is hereby issued to the public in general and all interested bidders under the provisions of Insolvency and Bankruptcy Code, 2016 read with IBI (Liquidation Process) Regulations, 2016, that the auction date for the sale of properties of the Corporate Debtor under the liquidation process, initially scheduled for October 25, 2024, which was mentioned in the auction notice dated September 28, 2024, has been rescheduled. The new date for the auction is October 29, 2024, and the auction notice dated September 28, 2024, shall be read accordingly.

**தமிழக அரசின் அரும்பு, மொட்டு, மலர் பயிற்சி நூல் எண்ணும், எழுத்தும் புத்தகங்கள் மாணவர்களுக்கு வரங்கல்**  
தேவகோட்டை, அக்.16- சிவசங்க மாவட்டம் தேவகோட்டை சேர்மன் மாணிக்க வாசகம் நடுநிலைப் பள்ளியில் மாணவர்களுக்கு எண்ணும், எழுத்தும் பயிற்சி நூல்களும் அரும்பு, மொட்டு, மலர் பயிற்சி நூல்களும் மாணவர்களுக்கு அரும்பு, மொட்டு, மலர் பயிற்சி நூல்களும் பள்ளிகளில் வழங்கப்பட்டது. தேவகோட்டை சேர்மன் மாணிக்க வாசகம் நடுநிலைப் பள்ளியில் தேவகோட்டை வட்டார வளமைய மேற்பார்வையாளர் காந்தியேசுவர் மற்றும் பள்ளி தலைமை ஆசிரியர் வெ.சொக்கலிங்கம், பள்ளியின் பெற்றோர் ஆசிரியர் கழக உறுப்பினர்கள் எண்ணும் எழுத்தும் பயிற்சி நூல்களும் மாணவர்களுக்கு வழங்கினார்கள். ஒன்றாம் வகுப்பு முதல் ஐந்தாம் வகுப்பு வரை புத்தகங்கள் மாணவர்களுக்கு வழங்கப்பட்டது.

**CORRIGENDUM TO E-AUCTION SALE NOTICE**  
Sale of Immovable Property of Navigator Creators Private Limited (In Liquidation)  
This corrigendum is hereby issued to the public in general and all interested bidders under the provisions of Insolvency and Bankruptcy Code, 2016 read with IBI (Liquidation Process) Regulations, 2016, that the auction date for the sale of properties of the Corporate Debtor under the liquidation process, initially scheduled for October 25, 2024, which was mentioned in the auction notice dated September 28, 2024, has been rescheduled. The new date for the auction is October 29, 2024, and the auction notice dated September 28, 2024, shall be read accordingly.

**CORRIGENDUM TO E-AUCTION SALE NOTICE**  
Sale of Immovable Property of Dublin Promoters Private Limited (In Liquidation)  
This corrigendum is hereby issued to the public in general and all interested bidders under the provisions of Insolvency and Bankruptcy Code, 2016 read with IBI (Liquidation Process) Regulations, 2016, that the auction date for the sale of properties of the Corporate Debtor under the liquidation process, initially scheduled for October 25, 2024, which was mentioned in the auction notice dated September 28, 2024, has been rescheduled. The new date for the auction is October 29, 2024, and the auction notice dated September 28, 2024, shall be read accordingly.

**CORRIGENDUM TO E-AUCTION SALE NOTICE**  
Sale of Immovable Property of Seastar Realtors Private Limited (In Liquidation)  
This corrigendum is hereby issued to the public in general and all interested bidders under the provisions of Insolvency and Bankruptcy Code, 2016 read with IBI (Liquidation Process) Regulations, 2016, that the auction date for the sale of properties of the Corporate Debtor under the liquidation process, initially scheduled for October 25, 2024, which was mentioned in the auction notice dated September 28, 2024, has been rescheduled. The new date for the auction is October 29, 2024, and the auction notice dated September 28, 2024, shall be read accordingly.

## Paving way for new lasers & LEDs

Researchers have developed and demonstrated a technique that allows them to engineer a class of materials called layered hybrid perovskites (LHPs) down to the atomic level, which dictates precisely how the materials convert electrical charge into light. The technique opens the door to engineering materials tailored for use in next-generation printed LEDs and lasers - and holds promise for engineering other materials for use in photovoltaic devices.

Perovskites, which are defined by their crystal-line structure, have desirable optical, electronic and quantum properties. LHPs consist of incredibly thin sheets of perovskite semiconductor material that are separated from each other by thin organic "spacer" layers. LHPs can be laid down as thin films consisting of multiple sheets of perovskite and organic spacer layers. These materials are desirable because they can efficiently convert electrical charge into light, making them promising for use in next-generation LEDs, lasers and photonic integrated circuits.

However, while LHPs

have been of interest to the research community for years, there was little understanding of how to engineer these materials in order to control their performance characteristics. To understand what the researchers discovered, you have to start with quantum wells, which are sheets of semiconductor material sandwiched between spacer layers. "We knew quantum wells were forming in LHPs - they're the layers," says Aram Amassian, corresponding author of a paper on the work and a professor of materials science and engineering at North Carolina State University. And understanding the size distribution of quantum wells is important because energy flows from high-energy structures to low-energy structures at the molecular level. "A quantum well that is two atoms thick has higher energy than a quantum well that is five atoms thick," says Kenan Gundogdu, co-author of the paper and a professor of physics at NC State. "And in order to get energy to flow efficiently, you want to have quantum wells that are three and

four atoms thick between the quantum wells that are two and five atoms thick. You basically want to have a gradual slope that the energy can cascade down." "But people studying LHPs kept running into an anomaly: the size distribution of quantum wells in an LHP sample that could be detected via X-ray diffraction would be different than the size distribution of quantum wells that could be detected using optical spectroscopy," Amassian says. "For example, diffraction might tell you that your quantum wells are two atoms thick, as well as there being a three-dimensional bulk crystal," Amassian says. "But spectroscopy might tell you that you have quantum wells that are two atoms, three atoms, and four atoms thick, as well as the 3D bulk phase. "So, the first question we had was: why are we seeing this fundamental disconnect between X-ray diffraction and optical spectroscopy? And our second question was: how can we control the size and distribution of quantum wells in LHPs?" Through a series of experiments the researchers discovered that there was a key player involved in answering both questions: nanoplatolets. "Nanoplatolets are individual sheets of the

## Pegatron showcases 5G network innovations

Pegatron 5G, a provider of Open RAN (O-RAN) compliant products and 5G network solutions, is showcasing its latest innovations at India Mobile Congress (IMC) 2024, a key global event for mobile technology, being held in New Delhi from October 15 to 18. Pegatron 5G is committed to supporting India's growing 5G infrastructure and "Make in India" policy. At IMC 2024, we will unveil the PR1450 O-RU and Fronthaul Multiplexer (FHM), designed to provide innovative and cost effective in-building coverage for enterprise and public deployments. The PR1450 O-RU offers reliable indoor connectivity, while the FHM simplifies network configurations for efficient deployments. Both solutions provide flexibility and operational efficiency for various 5G environments. In addition to core networking products, Pegatron 5G offers a range of Customer Premises Equipment (CPE) and RedCap solutions tailored to the Indian market. These products enable seamless connectivity across industries, supporting diverse applications. We collaborate with global industry vendors, leveraging our expertise to deliver advanced solutions. At IMC 2024, we are demonstrating network in

a radio, energy efficiency functionality for small cells and displaying Pegatron 5G's innovative and cost effective 5G in-building coverage solution and 5G site infrastructure solution for different environments with our partners. We are open to collaborating with additional partners to provide cost effective and reliable 'Make in India' 5G solution for enterprise and public networks. "Pegatron 5G is providing 5G O-RAN private networks and AI application based solutions to optimize our factories throughout Asia and the rest of the world." CY Feng, General Manager of Pegatron BG6 Communication Products said, "we are excited to work with our Indian partner companies and invest in our new facility in Chennai, focused on communication products to support the 'Make in India' policy."

## Math solutions to help future of comp science

A Rutgers University-New Brunswick professor who has devoted his career to resolving the mysteries of higher mathematics has solved two separate, fundamental problems that have perplexed mathematicians for decades. The solutions to these long-standing problems could further enhance our understanding of symmetries of structures and objects in nature and science, and of long-term behavior of various random processes arising in fields ranging from chemistry and physics to engineering, computer science and economics. Pham Tiep, the Joshua Barlaz Distinguished Professor of Mathematics in the Rutgers School of Arts and Science's Department of Mathematics, has completed a proof of the 1955 Height Zero Conjecture posed by Richard Brauer, a leading German-American mathematician who died in 1977. Proof of the conjecture - commonly viewed as one of the most outstanding challenges in a field of math known as the representation theory of finite groups - was published recently.

## Math solutions to help future of comp science

A Rutgers University-New Brunswick professor who has devoted his career to resolving the mysteries of higher mathematics has solved two separate, fundamental problems that have perplexed mathematicians for decades. The solutions to these long-standing problems could further enhance our understanding of symmetries of structures and objects in nature and science, and of long-term behavior of various random processes arising in fields ranging from chemistry and physics to engineering, computer science and economics. Pham Tiep, the Joshua Barlaz Distinguished Professor of Mathematics in the Rutgers School of Arts and Science's Department of Mathematics, has completed a proof of the 1955 Height Zero Conjecture posed by Richard Brauer, a leading German-American mathematician who died in 1977. Proof of the conjecture - commonly viewed as one of the most outstanding challenges in a field of math known as the representation theory of finite groups - was published recently. "A conjecture is an idea that you believe has some validity," said Tiep, who has thought about the Brauer problem for most of his career and worked on it intensively for the past 10 years. "But conjectures have to be proven. I was hoping to advance the field. I never expected to be able to solve this one." In a sense, Tiep and his colleagues have been following a blueprint of challenges Brauer laid out for them in a series of mathematical conjectures posed and published in the 1950-60s. "Some mathematicians have this rare intellect," Tiep said of Brauer. "It's as though they came from another planet or from another world. They are capable of seeing hidden phenomena that others can't." In the second advance, Tiep solved a difficult problem in what is known as the Deligne-Lusztig theory, part of the foundational machinery of representation theory. The breakthrough touches on traces, an important feature of a rectangular array known as a matrix. The trace of a matrix is the sum of its diagonal elements. "Tiep's high-quality work and expertise on finite groups has allowed Rutgers to maintain its status as a top world-wide center in the subject," said Stephen Miller, a Distinguished Professor and Chair of the Department of Mathematics. "One of the great accomplishments in 20th century mathematics was the classification of the so-called but perhaps misleadingly named 'simple' finite groups, and it is synonymous with Rutgers - it was led from here and many of the most interesting examples were discovered here. Through his amazing stretch of strong work, Tiep brings international visibility to our department."

# It matters

## Paving way for new lasers & LEDs

Researchers have developed and demonstrated a technique that allows them to engineer a class of materials called layered hybrid perovskites (LHPs) down to the atomic level, which dictates precisely how the materials convert electrical charge into light. The technique opens the door to engineering materials tailored for use in next-generation printed LEDs and lasers - and holds promise for engineering other materials for use in photovoltaic devices.

Perovskites, which are defined by their crystalline structure, have desirable optical, electronic and quantum properties. LHPs consist of incredibly thin sheets of perovskite semiconductor material that are separated from each other by thin organic "spacer" layers. LHPs can be laid down as thin films consisting of multiple sheets of perovskite and organic spacer layers. These materials are desirable because they can efficiently convert electrical charge into light, making them promising for use in next-generation LEDs, lasers and photonic integrated circuits.

However, while LHPs have been of interest to the research community for years, there was little understanding of how to engineer these materials in order to control their performance characteristics.

To understand what the researchers discovered, you have to start with quantum wells, which are sheets of semiconductor material sandwiched be-

tween spacer layers. "We knew quantum wells were forming in LHPs - they're the layers," says Aram Amassian, corresponding author of a paper on the work and a professor of materials science and engineering at North Carolina State University.

And understanding the size distribution of quantum wells is important because energy flows from high-energy structures to low-energy structures at the molecular level. "A quantum well that is two atoms thick has higher energy than a quantum well that is five atoms thick," says Kenan Gundogdu, co-author of the paper and a professor of physics at NC State. "And in order to get energy to flow efficiently, you want to have quantum wells that are three and four atoms thick between the quantum wells that are two and five atoms thick. You basically want to have a gradual slope that the energy can cascade down." "But people studying LHPs kept running into an anomaly: the size distribution of quantum wells in an LHP sample that could be detected via X-ray diffraction would be different than the size distribution of quantum wells that could be detected using optical spectroscopy," Amassian says.

"For example, diffraction might tell you that your quantum wells are two atoms thick, as well as there being a three-dimensional bulk crystal," Amassian says. "But spec-

troscopy might tell you that you have quantum wells that are two atoms, three atoms, and four atoms thick, as well as the 3D bulk phase. "So, the first question we had was: why are we seeing this fundamental disconnect between X-ray diffraction and optical spectroscopy? And our second question was: how can we control the size and distribution of quantum wells in LHPs?"

Through a series of experiments the researchers discovered that there was a key player involved in answering both questions: nanoplatelets.

"Nanoplatelets are individual sheets of the perovskite material that form on the surface of the solution we use to create LHPs," Amassian says. "We found that these nanoplatelets essentially serve as templates for layered materials that form

under them. So, if the nanoplatelet is two atoms thick, the LHP beneath it forms as a series of two-atom-thick quantum wells. "However, the nanoplatelets themselves aren't stable, like the rest of the LHP material. Instead, the thickness of nanoplatelets keeps growing, adding new layers of atoms over time. So, when the nanoplatelet is three atoms thick, it forms three-atom quantum wells, and so on. And, eventually, the nanoplatelet grows so thick that it becomes a three-dimensional crystal."

This finding also resolved the longstanding anomaly about why X-ray diffraction and optical spectroscopy were providing different results. Diffraction detects the stacking of sheets and therefore does not detect nanoplatelets, whereas optical spectroscopy detects isolated sheets.

"What's exciting is that

we found we can essentially stop the growth of nanoplatelets in a controlled way, essentially tuning the size and distribution of quantum wells in LHP films," Amassian says. "And by controlling the size and arrangement of the quantum wells, we can achieve excellent energy cascades - which means the material is highly efficient and fast at funneling charges and energy for the purposes of laser and LED applications."

When the researchers found that nanoplatelets played such a critical role in the formation of perovskite layers in LHPs, they decided to see if nanoplatelets could be used to engineer the structure and properties of other perovskite materials - such as the perovskites used to convert light into electricity in solar cells and other photovoltaic technologies.

## Pegatron showcases 5G network innovations

Pegatron 5G, a provider of Open RAN (O-RAN) compliant products and 5G network solutions, is showcasing its latest innovations at India Mobile Congress (IMC) 2024, a key global event for mobile technology, being held in New Delhi from October 15 to 18.

Pegatron 5G is committed to supporting India's growing 5G infrastructure and "Make in India" policy. At IMC 2024, we will unveil the PR1450 O-RU and Fronthaul Multiplexer (FHM), designed to provide innovative and cost effective in-building coverage for enterprise and public deployments. The PR1450 O-RU offers reliable indoor connectivity, while the FHM simplifies network configurations for efficient deployments. Both solutions provide flexibility and operational efficiency for various 5G environments.

In addition to core networking products, Pegatron 5G offers a range of Customer Premises Equipment (CPE) and RedCap solutions tailored to the Indian market. These products enable seamless connectivity across industries,

supporting diverse applications. We collaborate with global industry vendors, leveraging our expertise to deliver advanced solutions. At IMC 2024, we are demonstrating network in a radio, energy efficiency functionality for small cells and displaying Pegatron 5G's innovative and cost effective 5G in-building coverage solution and 5G site infrastructure solution for different environments with our partners. We are open to collaborating with additional partners to provide cost effective and reliable "Make in India" 5G solution for enterprise and public networks.

"Pegatron 5G is providing 5G O-RAN private networks and AI application based solutions to optimize our factories throughout Asia and the rest of the world," CY Feng, General Manager of Pegatron BG6 Communication Products said, "we are excited to work with our Indian partner companies and invest in our new facility in Chennai, focused on communication products to support the 'Make in India' policy."

## Researchers unveil more precise 3D printing tech

Multimaterial 3D printing enables makers to fabricate customised devices with multiple colours and varied textures. But the process can be time-consuming and wasteful because existing 3D printers must switch between multiple nozzles, often discarding one material before they can start depositing another.

Researchers from MIT and Delft University of Technology have now introduced a more efficient, less wasteful, and higher-precision technique that leverages heat-responsive materials to print objects that have multiple colours, shades, and textures in one step.

Their method, called speed-modulated ironing, utilizes a dual-nozzle 3D printer. The first nozzle deposits a heat-responsive

filament and the second nozzle passes over the printed material to activate certain responses, such as changes in opacity or coarseness, using heat. By controlling the speed of the second nozzle, the researchers can heat the material to specific temperatures, finely tuning the color, shade, and roughness of the heat-responsive filaments. Importantly, this method does not require

any hardware modifications. The researchers developed a model that predicts the amount of heat the "ironing" nozzle will transfer to the material based on its speed. They used this model as the foundation for a user interface that automatically generates printing instructions which achieve color, shade, and texture specifications.

## Math solutions to help future of comp science

A Rutgers University-New Brunswick professor who has devoted his career to resolving the mysteries of higher mathematics has solved two separate, fundamental problems that have perplexed mathematicians for decades.

The solutions to these long-standing problems could further enhance our understanding of symmetries of structures and objects in nature and science, and of long-term behavior of various random processes arising in fields ranging from chemistry and physics to engineering, computer science and economics.

Pham Tiep, the Joshua Barlaz Distinguished Professor of Mathematics in the Rutgers School of Arts and Science's Department of Mathematics, has completed a proof of the 1955 Height Zero Conjecture posed by Richard Brauer, a leading German-American mathematician who died in 1977. Proof of the conjecture - commonly viewed as one of the most outstanding challenges in a field of math known as the representation theory of finite groups - was published recently.

"A conjecture is an idea that you believe has some validity," said Tiep, who has thought about the Brauer problem for most of his career and worked on it intensively for the past 10 years. "But conjectures have to be proven. I was hoping to advance the field. I never expected to be able to solve this one."

In a sense, Tiep and his colleagues have been following a blueprint of challenges Brauer laid out for them in a series of mathematical conjectures posed and published in the 1950-60s. "Some mathematicians have this rare intellect," Tiep said of Brauer. "It's as though they came from another planet or from another world. They are capable of seeing hidden phenomena that others can't." In the second advance, Tiep solved a difficult problem in what is known as the Deligne-Lusztig theory, part of the foundational machinery of representation theory. The breakthrough touches on traces, an important feature of a rectangular array known as a matrix. The trace of a matrix is the sum of its diagonal elements.

"Tiep's high-quality work and expertise on finite groups has allowed Rutgers to maintain its status as a top world-wide center in the subject," said Stephen Miller, a Distinguished Professor and Chair of the Department of Mathematics. "One of the great accomplishments in 20th century mathematics was the classification of the so-called but perhaps misleadingly named 'simple' finite groups, and it is synonymous with Rutgers -- it was led from here and many of the most interesting examples were discovered here. Through his amazing stretch of strong work, Tiep brings international visibility to our department."

Mathematicians have worked out how to give robots complex instructions without electricity for the first time which could free up more space in the robotic 'brain' for them to 'think'.

Mimicking how some parts of the human body work, researchers from King's College London have transmitted a series of commands to devices with a new kind of compact circuit, using variations in pressure from a fluid inside it.

They say this world first opens up the possibility of a new generation of robots, whose bodies could operate independently of their built-in control centre, with this space potentially being used instead for more complex AI powered software.

## Scientists free up robot brain space

Engineers have worked out how to give robots complex instructions without electricity for the first time which could free up more space in the robotic 'brain' for them to 'think'.

They say this world first opens up the possibility of a new generation of robots, whose bodies could operate independently of their built-in control centre, with this space potentially being used instead for more complex AI powered software.

Mathematicians have worked out how to give robots complex instructions without electricity for the first time which could free up more space in the robotic 'brain' for them to 'think'.

Mimicking how some parts of the human body work, researchers from King's College London have transmitted a series of commands to devices with a new kind of compact circuit, using variations in pressure from a fluid inside it.

They say this world first opens up the possibility of a new generation of robots, whose bodies could operate independently of their built-in control centre, with this space potentially being used instead for more complex AI powered software.
