DATA RELEASED UNDER REVISED BASE OF 2022-23

May WPI at 9.68% on high fuel prices

FE BUREAU
New Delhi, June 15

INDIA'S WHOLESALE PRICE INFLATION (WPI) jumped 9.68% on year in May, up from 8.26% in April, driven by higher prices of manufactured products, fuel and power.

In May, the WPI-based inflation was released on the revised base of 2022-23, replacing the earlier base of 2011-12. Along with the revised WPI, the Office of Economic Advisor in Department for Promotion of Industry and Internal Trade (DPIIT) released Output Producer Price Index (OPPI), Trial Input Producer Price Index (IPPI), and Service Producer Price Index (Service PPI) of seven services for the first time. The WPI revision has resulted in expansion of the basket of products whose prices are tracked while compiling the

index to 957 from 697. In the new WPI series, the weight of Fuel and Power has been raised to 14.11 from

13.15. In May, the inflation in this group was recorded at 30.33%. Within fuel and power the inflation in crude and natural gas stood at 61.51% while for mineral oils it was 49.82%.

The main driver of fuel inflation was the situation in West Asia that led to prices of petroleum crude and products remaining close to \$100 a barrel. The impact of high fuel prices was seen in the inflation for manufactured products. The WPI for manufactured goods in May was 7.48% on year. Within manufacturing chemicals, metals & electrical equipments was where the maximum price pressure was seen.

WPI for primary articles was up 4.99%. The food index within WPI was up 4.49% in May. With positive developments around West Asia, global energy prices have seen significant cooling.

IMD: Monsoon 'deficient' at 28% of benchmark

● FM flags impact on farmers' income

SANDIP DAS
New Delhi, June 15

THE PROGRESS OF the southwest monsoon has been sluggish so far with cumulative rainfall until June 14 being just 28.4% below the benchmark longer period average (LPA) for the period. This is in the 'deficient' range, according to the India Meteorological Department's (IMD) criteria.

This follows the late arrival of monsoon over Kerala on June 5 against the usual date of June 1. Finance Minister Nirmala Sitharaman on Monday expressed concern over the impact deficient rains would have on farmers' income as the IMD has officially forecast a below-normal monsoon for 2026. "Of course, we have enough buffer stocks. Since last year we've maintained it, so there shouldn't be a food shortage. But for farmers, it'll have an impact because this year his income will be stressed out," Sitharaman said at an event.

She also pointed to the challenge of securing fertilisers for farmers in the face of supply disruptions due to the West Asia war and resultant price fluctuations

According to IMD, cumulative rainfall during June 1-June 14 was 40.2 millimeters (mm) against the LPA of 56.1 mm. In terms of monthly rainfall, the IMD has forecast "below normal rainfall" at less than 92% of LPA in June. This marks the first year since 2023 that seasonal rainfall is expected to fall below the LPA.

"There's an increasing probability that June will end with below-average rainfall in the country, with huge rainfall deficits in states such as Maharashtra and Gujarat in particular," Akshay Deoras, senior research scientist at the Department of Meteorology, University of Reading, UK, told FE.

Deoras said, "There are signs of the monsoon reviving after June 20. We can, therefore, expect rains to increase over peninsular India and the monsoon to advance into more parts of eastern India and some parts of central India by June 25".

ODISHA, CHHATTISGARH, MP MORE VULNERABLE TO ELNINO

STATES SUCH AS Odisha, Chhattisgarh, Madhya Pradesh and Uttar Pradesh are more vulnerable to the emergent El Nino. Odisha and Chhattisgarh have lower irrigation coverage —30.5% and 32.2%, respectively—compared to the national average of 60%, according to the Resilience Index Score developed by Care Edge. The two states also have a higher share of water-intensive crops in the kharif output. Uttar

Pradesh also has high water-intensive kharif crops and Madhya Pradesh has relatively limited diversification towards allied activities. A lower score on the index implies the state is relatively more vulnerable, while a higher score denotes relative resilience. The rating agency used six parameters to construct the index: reservoir

levels, the share of agricultural gross value added (GVA) in overall GVA, the share of non-crop GVA in agricultural GVA, irrigation coverage, the share of water-intensive crops in kharif output, and the average deviation of rainfall from long period average (LPA) over the last 50 years.

Gujarat unveils new industrial policy, sets ₹10 lakh cr target

FE BUREAU
Gandhinagar, June 15

GUJARAT HAS UNVEILED its Industrial Policy 2026, targeting investments worth ₹10 lakh crore during the five-year policy period. The policy combines higher incentives, support for MSMEs, promotion of emerging sectors, and a new framework aimed at shifting industries away from congested urban centres.

One of the key features of the policy, titled Viksit Gujarat Industrial Policy 2026, is a 50% capital subsidy for R&D centres, with building costs capped at 20% of the total investment. The subsidy is available for the first five R&D centres with a minimum investment of ₹300 crore, subject to a cap of ₹50 crore per annum for five years.

In a first-of-its-kind initiative, the policy also gives a

State offers higher subsidies, relocation benefits, and sector-specific support to draw investments

thrust to Mission THRIVE (Transition for Harmonized Relocation and Inclusive Vibrant Economy), aimed at decongesting cities and improving urban living by encouraging eligible industrial units to relocate outside city limits.

Under the initiative, relocated units will be treated as new units and become eligible for incentives, wage support for workers, housing assistance, and relaxations in land conversion and transfer norms.

The policy has emphasised special support for MSMEs

through a dedicated incentive framework. MSMEs will be eligible for incentive support of up to 45% of eFCI in Category-A talukas through a combination of capital subsidy, interest subsidy, and power tariff benefits.

The government has also created a new category—ultra-mega projects—under which units can avail incentive support of up to 40% of eFCI in Category-A talukas and 35% in Category-B talukas over a 12-year period. In addition, the policy has identified 21 thrust sectors, including green hydrogen and green ammonia, electrolyzers, renewable energy equipment, battery storage systems, electric mobility, aerospace and space manufacturing, semiconductors, pharmaceuticals, critical minerals, nuclear power equipment, textile recycling, electronic waste recycling, robotics, and drones.

Govt releases PPI data, WPI to be phased out in 5 years

PRESS TRUST OF INDIA
New Delhi, June 15

THE GOVERNMENT ON Monday came out with producer price index (PPI) data for both goods and services for the first time to better reflect price movement, paving the way for phasing out wholesale price inflation numbers in the next five years.

This is in line with practices adopted by advanced economies and the recommendations of the International Monetary Fund (IMF), which stressed that there is a growing need for India to transition from WPI to Producer Price Index (PPI).

Availability of both output and input PPI would give a bet-

ter understanding of the price movements of output items vis-a-vis input items being used in an industry.

"It also explains how inflation experienced by producers on input items is passed through the output being produced," the commerce and industry ministry said, adding that the release of WPI index would be discontinued after five years.

All India Output PPI for all commodities for May 2026 stands at 109.6, whereas it was 108.6 in April 2026, whereas the manufacturing sector in May 2026 stands at 104.9.

This is in line with the recommendations of the IMF, which stressed that there is a growing need for India to transition from WPI to PPI

The ministry said the input PPI is being published on an experimental basis and would enable the department to examine the data quality and also receive feedback of stakeholders and users.

Along with the May WPI data, the government on Monday released the output and

input PPIs for the first time. In line with the WPI inflation, which increased to 9.68% in May from 8.26% in April, the output PPI increased to 9.4% in May from 8.1% in April.

The revised base year for both WPI and PPI data is 2022-23 and includes 957 items.

The ministry said the revised series of WPI and Output PPI (Goods) cover all representative goods transacted in the economy, whereas Input PPI (Goods) covers all representative goods consumed by the manufacturing industry.

Seven services -- banking, securities transaction, insur-

ance, management of pension funds, railways, air (passenger), and telecom -- have been covered in the first phase of Service PPI, while remaining services will be covered in the next phase, which would use the data collected through price collection survey of sampled establishments, obtained from GSTN, the Commerce and Industry Ministry said.

Manufactured items have the highest 69.93% weight in output PPI (Goods), followed by agriculture, forestry and fishing (22.16%), electricity (4.49%), and mining and quarrying (3.42%).
